

FOOD SAFETY

Food Safety & Compliance Software

Reduce Your Risk & Cost of Compliance

Our Food Safety program is a best-of-breed data collection, audit and compliance software solution that leverages mobile data collection and program automation to make it faster and easier for food and beverage companies to comply with regulatory, non-regulatory (GFSI) and customer requirements.

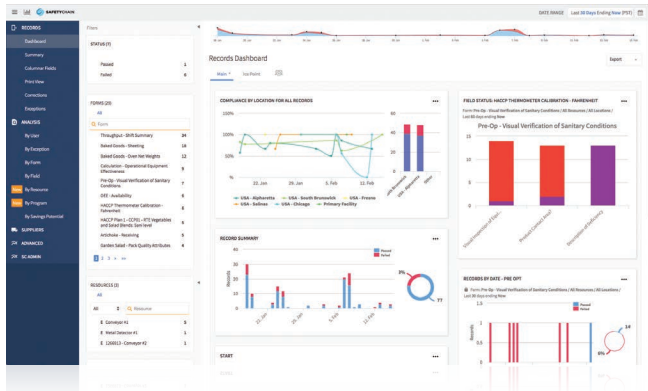

Food safety management is rapidly changing and increasingly complex, but

still managed by most facilities with outdated, inefficient paper, spreadsheet or offline systems. Whether your facility is GFSI certified or looking to maintain standards for your customers, SafetyChain can make compliance faster and easier than ever while unlocking the tremendous business value inherent in the data you are currently filing away on paper.

Our industry leading mobile technology enables controlled & auditable data collection from the production floor in real-time, while SafetyChain's cloud based platform allows instant update, visibility and management of all associated digital documents, forms, tasks and records. Together these features automate program management to save 50-80% of the time needed to prepare for an audit and eliminate the need for duplicate data entry. With SafetyChain you can be audit ready all the time with the ability to satisfy regulatory (FDA-HACCP, FDA-FSMA, USDA), GFSI (SQF, BRC, FSSC 22000, GlobalGap) and customer requirements with the click of a button.

Mobilize Your Facility with Easy-to-Use Mobile Forms & Tools

- | | | |
|-------------------------------------|------------------------------------|---|
| • SmartCapture Mobile Forms | • Task Scheduling | • On-Demand & Internal Audits |
| • Program Manager | • API Integrations | • GFSI Compliance (SQF, BRC, FSSC 22000) |
| • Real-Time Reports & Notifications | • Pre-Op & Sanitation Programs | • Regulatory Compliance (FDA, FSMA, USDA) |
| • Corrective Actions | • Pre-Shipment Reviews & Receiving | • HACCP Plan Automation |

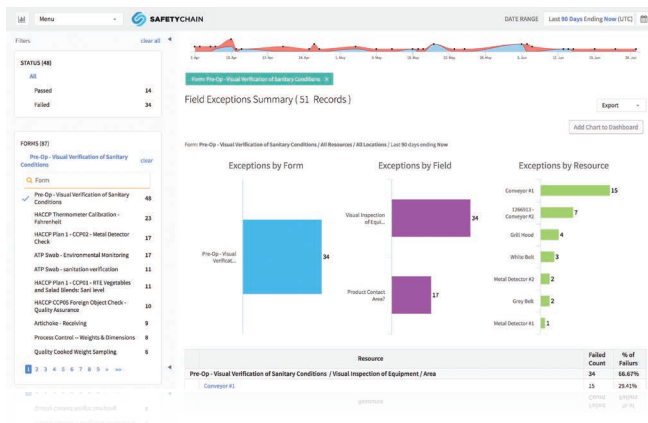

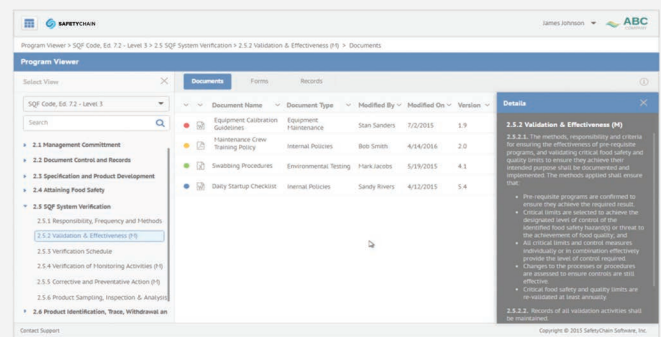

Capture and Process Program Data 50% Faster with Mobile Forms

Eliminate those piles of paper, complicated spreadsheets, and time-consuming manual entry tasks with our mobile SmartCapture forms. Make it easy for your team to organize, access and maintain food safety data instantly from the plant floor providing audit ready records and eliminating duplicate entry.

Save Time & Reduce Stress with Audit On-Demand

From receiving to finished product review SafetyChain enables every facility to be audit ready all the time by managing all of your digital documents and records in a secure, centralized system that's easy to organize and access.

Ensure Compliance with Automated Scheduling, Data Validation and Alerts

Unlock your data to identify trends, gain visibility into your food safety programs and take action to ensure compliance standards on the production floor and across your organization.

TRUSTED BY LEADING FOOD & BEVERAGE COMPANIES

One Click Access for Compliance

“With SafetyChain it's easier to manage program compliance with one-click access to non-compliant records. I can immediately discern root cause and determine the best course of action.”
Madison Maxwell,
Director of Food Safety & Compliance

Greater Visibility, Transparency and Control

“SafetyChain enables us to achieve greater visibility, transparency, and control across our food safety and quality operations.”
Robert Blais,
Chief Operating Officer
