

ENVIRONMENTAL HEALTH & SAFETY (EHS)

Integrated Cloud-Based EHS

Managing a plant must include comprehensive risk mitigation across all facilities. Leave behind the guesswork and hassle of doing EHS on spreadsheets, paper forms, and email. Automate data capture, review, and analyze incoming EHS data and create data-driven actions and processes with SafetyChain.

Identify & Predict Risks

Track safety incidents through real-time reporting to promptly correct safety issues. Monitor trends over time to spot emerging environmental, health, and safety concerns. Put an end to risk management guesswork by associating follow-up tasks, deadlines, and notifications to areas of risk.

Key Benefits

Faster response to incidents

Increase business transparency

Legal compliance

Reduce human error

Improve employee performance & confidence

Incident driven workflows, tasks & notifications

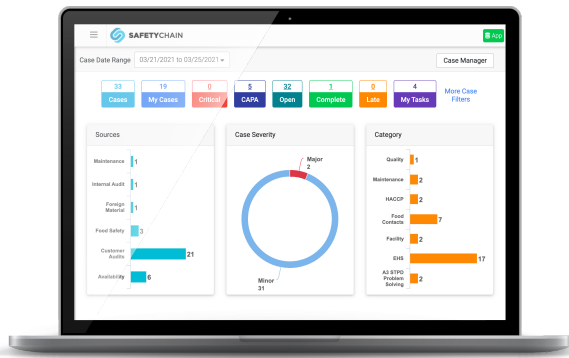

Reduce unnecessary expenses

Continual improvement approach

Automate audits

Communicate & Enforce EHS Protocols

Respond quickly to evolving safety requirements from regulatory agencies. Introduce new guidelines via digitized checklists that are accessible from the plant floor with a user-friendly custom form builder. Implement standardized checks to ensure employees are following all necessary protocols, from hand washing to wearing PPE. Conduct behavior-based safety observations to ensure protocols are reinforced.

Be Ready For EHS Audits 24/7

Be confident in your compliance efforts with an organized, centralized platform where all of your EHS-related policies and records are stored. Ensure all EHS records are available for personnel to review, sign off, and quickly report on as needed. Establish secure profiles to share records with auditors, support remote audits, and simplify onsite audits.

About SafetyChain

SafetyChain is the #1 Plant Management Platform that improves yield, maximizes productivity, and ensures compliance for process manufacturers. Trusted by over 1,500 facilities, SafetyChain is the only enterprise solution uniting production, quality, safety, and supplier management.
