

POULTRY LEADERS BECOME the Supplier of Choice

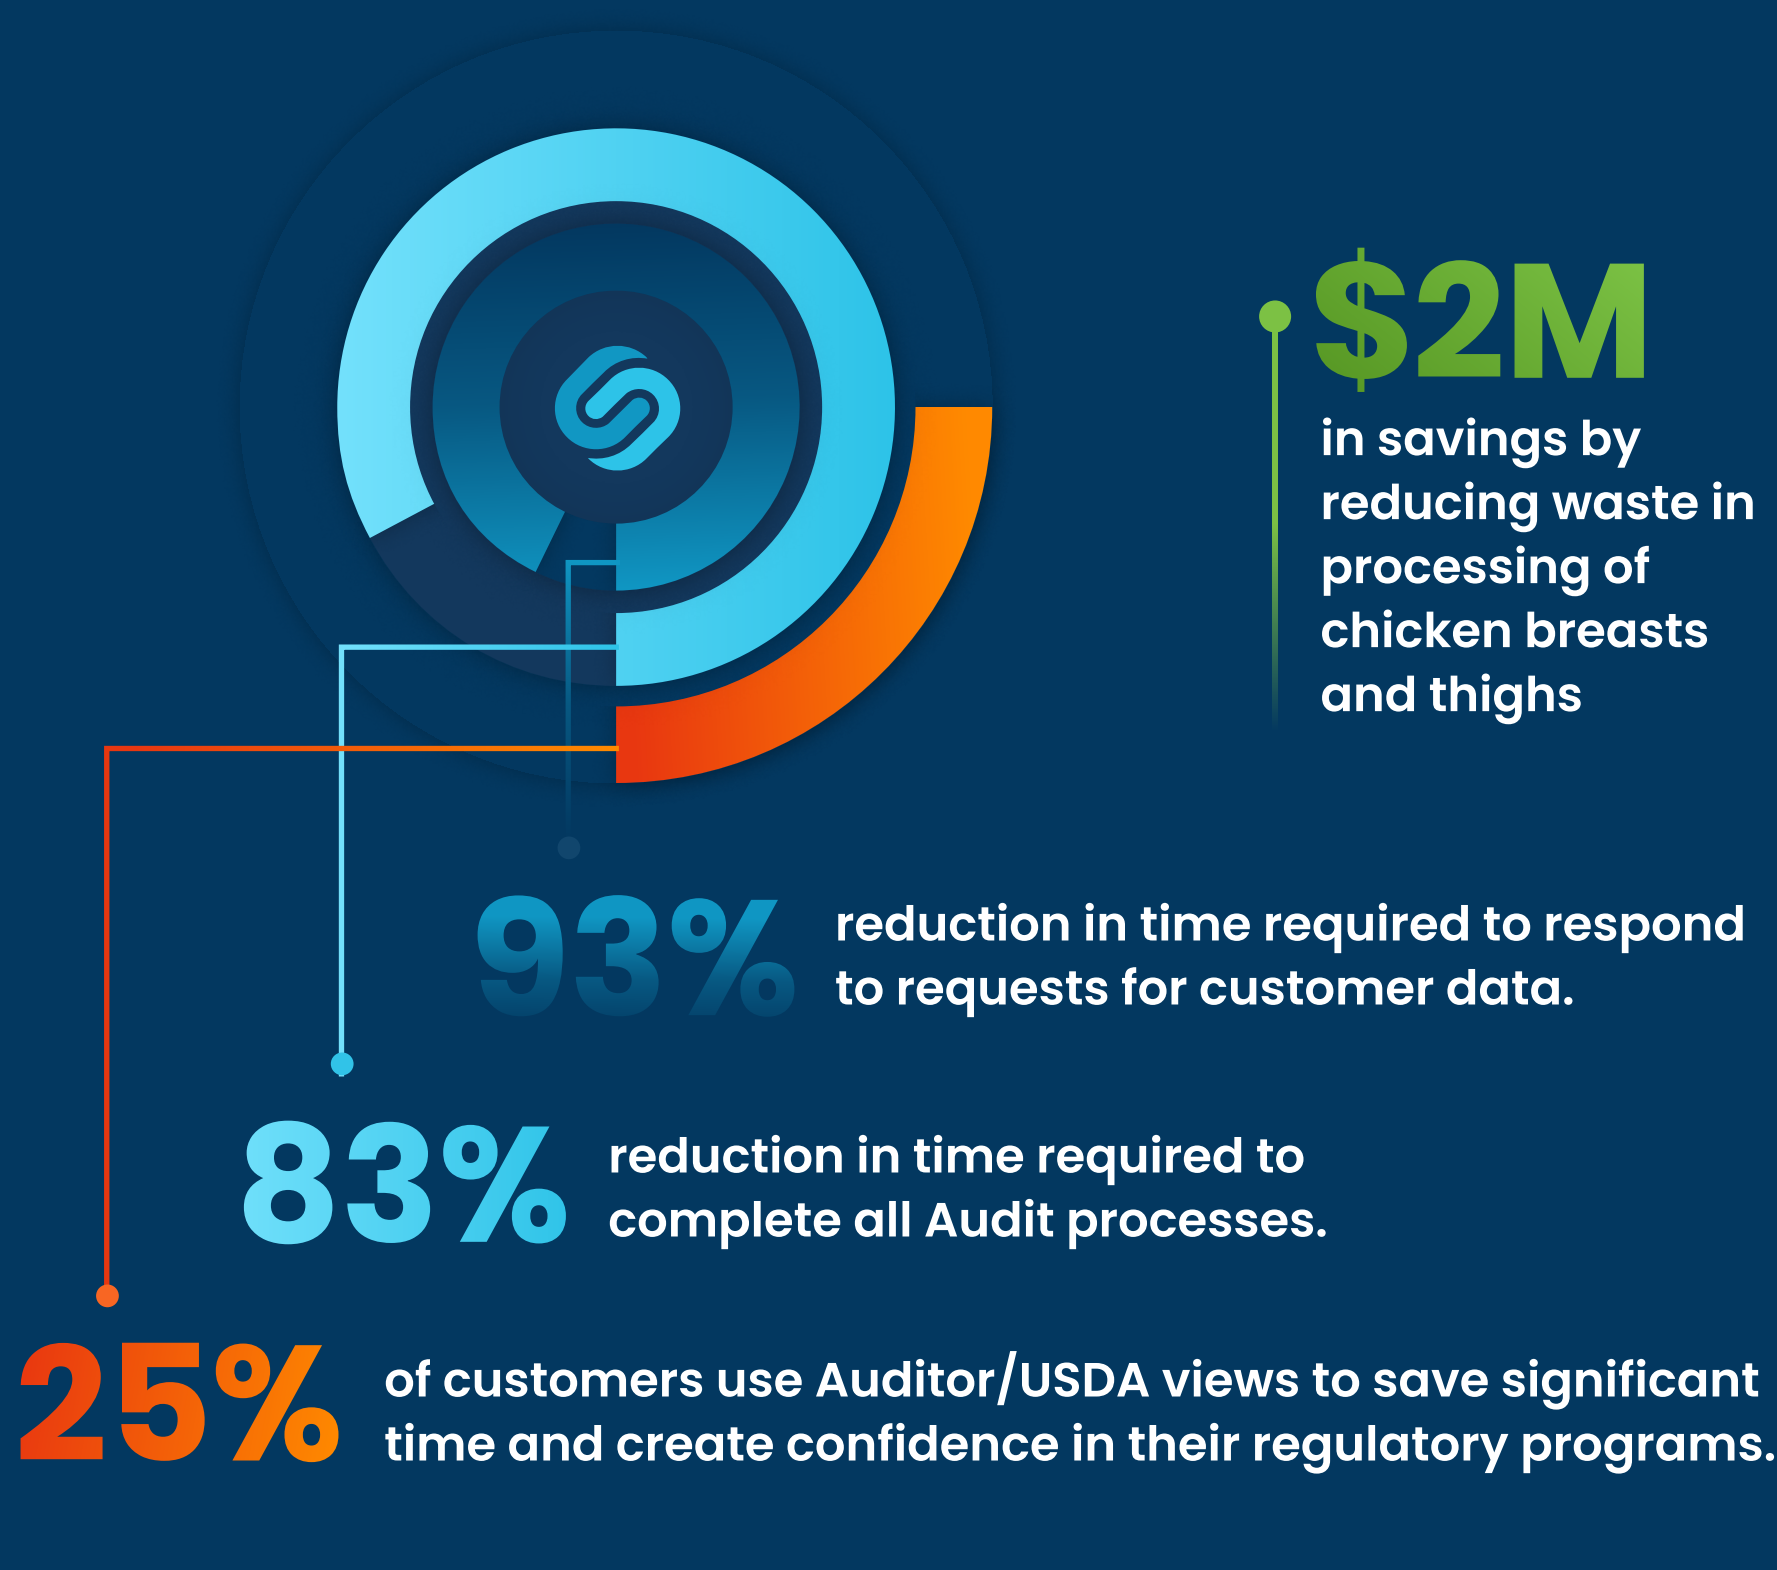

WITH

SafetyChain's Real-Time Data Visibility & Reporting Capabilities

Business Outcomes Driven by Unified Production and Quality Operations

Our customers use SafetyChain to unify their production and quality operations creating ease in reporting and audits, labor efficiencies, and significant operational and process savings.

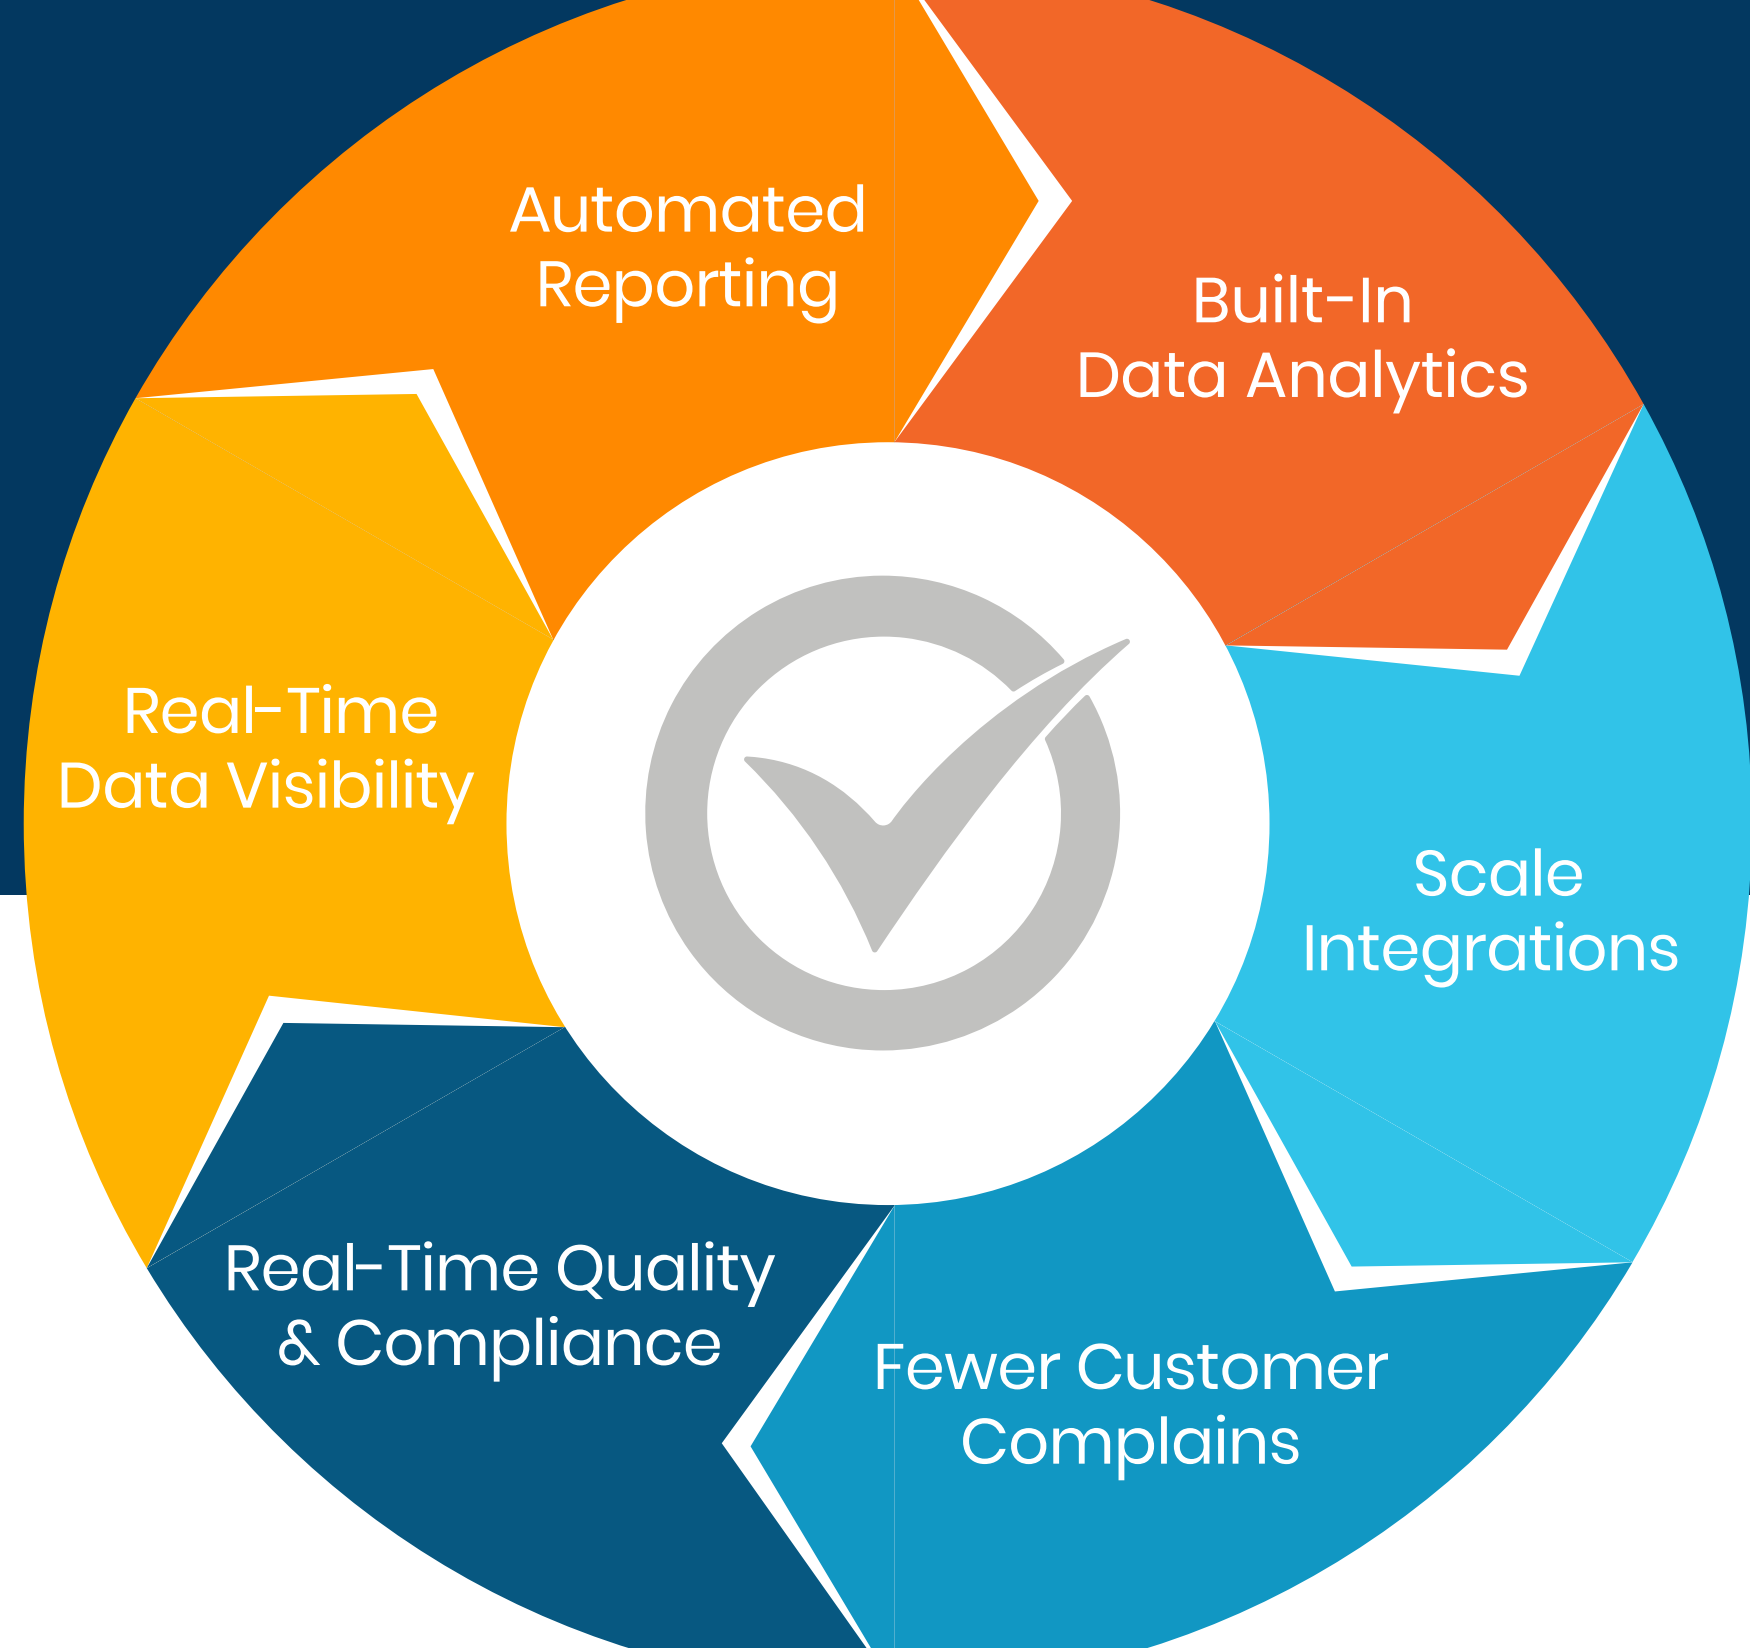

Satisfy Customer and Auditor Data Demands

Instill trust with streamlined information that secures larger contracts and keeps auditors off your back. Aggregate, provide, and exceed data expectations – with the click of a button, information is sent to:

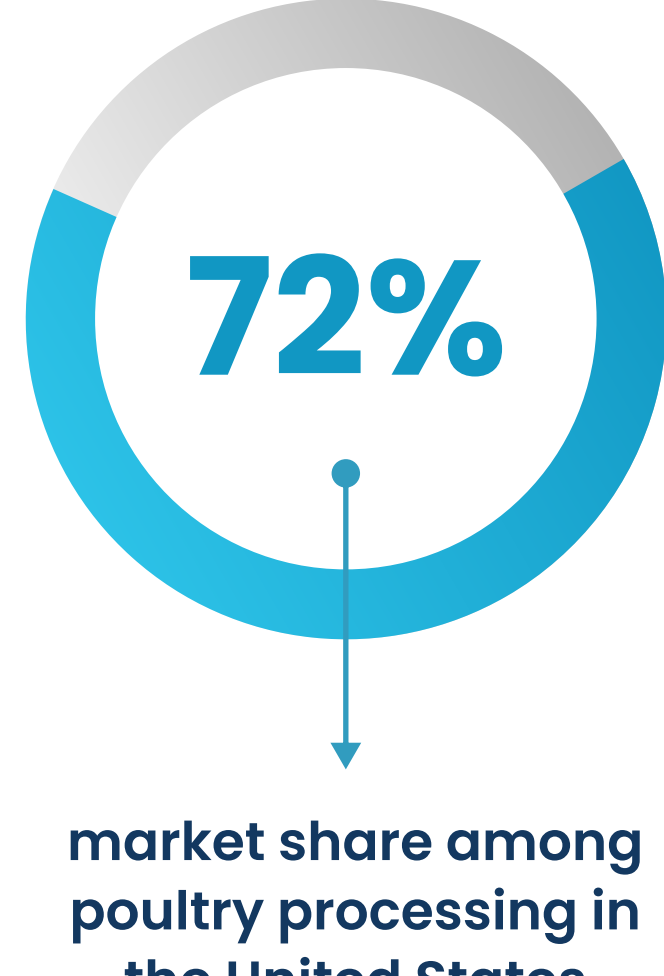

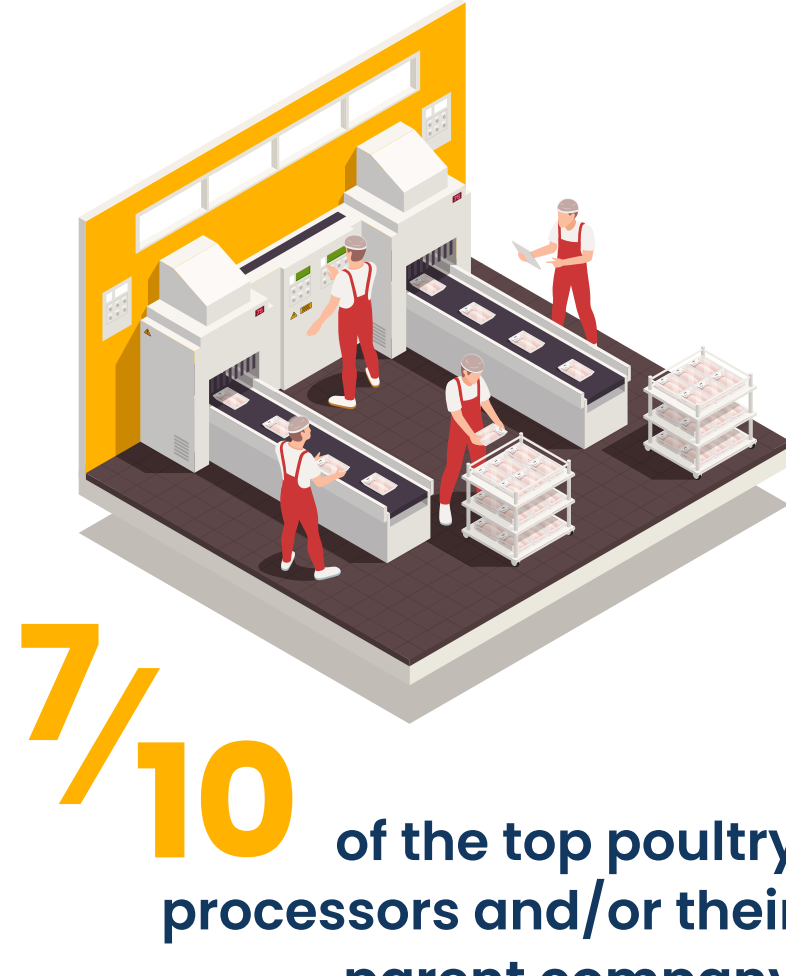

- National Food Brands
- National Restaurant Chains
- USDA

Ensure Consistency and Quality of Product & Operations

Give operators and plant leaders complete control over their programs. Intuitive and actionable information drives proactive management and accelerates plant performance.

SafetyChain Knows Poultry Processing

About SafetyChain

SafetyChain is a digital plant management platform for food and beverage manufacturers trusted in more than 2,500 facilities, including more than 70% of the country's top poultry processors, to improve plant performance. This platform unifies production and quality operations with plant-wide data, insights, and tools, delivering real-time visibility and control to management by eliminating paper and point solutions.
