reduction in time required to complete FSA Audit process

75%

reduction in time spent reviewing pre-shipment paperwork

50%

reduction in front-line operator turnover with employee touchpoint initiative

About SafetyChain

SafetyChain is a digital plant management platform for food and beverage manufacturers trusted in more than 2,500 facilities, including more than 70% of the country's top poultry processors, to improve plant performance. The platform unifies production and quality operations with plant-wide data, insights, and tools, delivering real-time visibility and control to management by eliminating paper and point solutions.
